

## National Cyber Olympiad

December 19, 2023

**“Competition is not about tearing others down, but about building yourself up.” – Jennifer Barnes**

Olympiads provide one with a competitive exam environment where students not only get to learn about the decorum, rules and regulations associated with the exam but also get a feel for the stress that is induced in the process and therefore they can learn to healthily cope with it in due time. Olympiads help students inculcate habits of regular practice revision and help them keep in touch with their academic syllabus, therefore not only benefiting their regular studies but also adding to their understanding in a great way.

**The National Cyber Olympiad (NCO) is organized by SOF for students of Grade - 1 to 10 to assess their skills in computer and information technology.**

This year 42 students appeared for this examination. The examination was held on December 19, 2023, in school premises during regular school timings. The examination was conducted successfully under the supervision of the teachers.

**Special thanks to Ms. Alka Chavda and Olympiad Team for coordination.**
