

National Level Science Talent Search Examination

December 15, 2023

“All of us do not have equal talent. But, all of us have equal opportunity to develop our talent.” – Dr. APJ Abdul Kalam

The focus on fundamentals is very important as when the child finishes studies he or she will have to face the competitive world armed with those fundamentals. Even while opting for higher studies, a student has to go through a complete scan of what he/she knows and how much. Exams like IIT-JEE, AIEEE, AFMC, AIIMS, GRE, GMAT, CAT etc., are designed to test the fundamental strength of a student. Hence the need of the hour is to build the fundamental-base as strong and as early as possible. This exactly is the philosophy behind Unified Council's NSTSE.

The National Level Science Talent Search Examination (NSTSE) is a test conducted by the Unified Council. It is a scientifically designed, skill-based assessment developed in India for Indian schools, after a detailed study of the syllabi of the Central and various State Boards. Rather than testing rote learning, it tests how well skill and concepts underlying the school syllabus have been learnt by the student. The test provides information on the strengths and weaknesses of individual students.

Adani Public School conducts various Olympiad examinations for the overall development of students. **This year 23 students appeared for this examination. The examination was held on December 15, 2023 in school premises** during regular school timings. The examination was conducted successfully under the supervision of the teachers. **Special thanks to Mr. Hiteshsinh Sodha and Olympiad Team for coordination.**
