

## Pearson App Training

Date: December 4<sup>th</sup> , 2023

**"Training is a great way to keep learning." – Matthea Harvey**

Mr. Gaurav and Mr. Sunil from Pearson Publication mentored the teachers about the Pearson App and Crystal Books used in 1 to 5 classes and 6 to 8 (Social Science). The app has made the tasks of teachers very easy. Their objective was to make teachers well acquainted with the new features in the App.

**The Teacher's App (Active App 2.0)** and the student's app have differences which were brought into notice by the trainers. They explained the steps on how to download the app and briefed up about all its features with the examples. The **Dynamic Question Bank (DQB)**, which proves to be teacher friendly was explained and how a question paper can be formed according to the rubrics of the school.

The crystal book can also be accessed offline and that was the best part for the teachers. The book has audio as well as video which could be used to teach the perfect pronunciation. Various inbuilt games can also be a part of assessment or homework.

Special Thanks to Principal, Dr. Mayur Patadia for arranging such enriching session.
