

School Field Trip – Class IV

October 24, 2024

"Field trips ignite curiosity and transform learning into an exciting quest for knowledge beyond the classroom walls."

An educational field trip enriches the learning process and contributes significantly to students' personal and academic growth. Interacting with peers and guides during trips helps students develop teamwork, communication, and social interaction skills.

APS organized the field trip of class IV to Regional Science Centre, Bhuj on October 24, 2024. All the sections of class IV (189 students) and their teachers went to the trip. **The objective of this journey was to foster curiosity and critical thinking through hands-on interactive exhibits that inspire exploration and experimentation.** Students enjoyed their bus journey and munched tidbits all the way with their friends. It was a splendid experience. They witnessed:

- Different galleries related to solar system, mathematics, sciences, plants, etc...the guides took them for a walk through.
- The models, miniature designs & layout and prototypes filled the students with awe.
- These centres are designed to engage children in a hands-on, interactive learning experience, fostering a deeper understanding of scientific principles and phenomena.
- Children enthusiastically noted the knowledge to be recalled in their diaries.
- It was an enriching experience both for students and teachers. They also got an exposure to new environment and a desire to learn more.

Special thanks to Management, (Director, Kutch Schools) Ms. Meeta Jadeja, (Director, APS) Ms. Ami Shah, (Principal – cum – Director, APS) Mr. Hemant Kumar Sharma, (Vice Principal, APS) Dr. Renu Patidar for taking permission and arranging such an enlightening trip.
