

## Class X visit to Regional Science Centre Bhuj

August 23, 2025

To commemorate National Space Day, 117 students from Class X of APS Mundra, accompanied by their class teachers, visited the Regional Science Centre in Bhuj on August 23, 2025. The visit was part of the centre's special celebrations for the day, offering the students a unique opportunity to witness the event firsthand.

To mark the occasion the Regional Science Centre, Bhuj, organized a series of special events and activities. The celebrations aimed to inspire and educate visitors about India's achievements in space exploration.

### Highlights of the celebration:

**Special Exhibitions:** The Centre's Space Science Gallery, featuring models of rockets, satellites, and interactive exhibits, was a major draw.

**Observatory Sessions:** With Bhuj's minimal light pollution, the Regional Science Centre's large public observatory offered visitors the opportunity to view celestial objects and learn about astronomy from experts.

**Interactive Sessions:** The event included interactive talks and Q&A sessions, allowing attendees to engage directly with space science topics. They were also given the unique opportunity to meet scientist from ISRO, (Space Scientist & Group Director) Dr. D. Ram Rajak and (Space Scientist Former Deputy Director) Shri Anand Pathak providing them with valuable insights and inspiration. They shared presentations based on India's Space Mission program.

In addition to witnessing the events, the students also took part in Drawing and Extempore competitions.

We are proud to share that one of our student Master Tathya Chudasama from class XB got third position in Extempore Competition.

Special thanks to (Director, APSM) Ms. Ami Shah, (Principal – cum – Director, APSM) Mr. Hemant Kumar Sharma and (Vice Principal, APSM) Dr. Renu Patidar for providing students with the wonderful opportunity to explore the world of science.
